"Fighting Jim."

(As told to The Sun Reporter by
Mr. Christie.)

At midnight on Friday last
Mr Christie the restaurantier
had just bid goodnight to his
last stray customer, pulled
down the blinds and locked
up, when a knock came to the
door. Mr Christie had some
misgivings as to the advisabil-
ity of opening the door, but
finally opens it, when in walks
a stranger and asks for a
package of cigars.

After being served, the in-
truder walked leisurely round,
whereupon Mr Christie sug-
gested that he depart. The
visitor replied to the effect
that there was lots of time,
so, to obtain help to oust him,
Christie headed for the tele-
phone, when the intruder
tackled him, and a struggle
ensued.

The entwined pair got as far
as the door, and Mr Christie's
intention was to throw the in-
truder out, when up pops the
latter's pal, and Jim had two
of 'em on his hands.

The alleged bandits had had
their car parked over at the
hotel corner for some time
previous, but on seeing they
weren't getting anywhere, in
their encounter with the res-
tauranteur, they hustled over
to their car, jumped in, and
beat it.

On being asked why he had
not phoned the police, Mr
Christie said: "I rang three
separate times, but got no an-
swer from Central."

On Saturday Mr Christie
admitted that he had not re-
ported the matter.

Mrs. Oatway's Bridge Party.

On Friday evening Mrs R.
M Oatway entertained a few
of her friends at her home, to
a small bridge party. The
lucky winners at bridge were
Mrs McCulla, Miss Mabelle
Clark, Mrs Walton. After
cards, a dainty lunch was
served by the hostess Mrs E.
H Walton of Fort Sask'n, and
Mrs D Davies of Kapassiwinn
were the honored guests of
the evening.

Those invited were: Miss
Ashcroft and Miss M Clark;
Mesdames Jas Malloch, L M
Larson, Geo J Bryan, C E
Gates, J Gannon, G Donald
son, J McCulla, A E Michael,
F W Yeats, L Kowski, W
E H Lewis, R A Walton, G
R Bone, F H Walton of Fort
Sask'n, D Davies of Kapassi-
win.

Sporting Notes—by F.H.C.

There seems to be something
to the rumor that we're to have
another team of ball tossers,
made-up of such nifty young
players as Eldie Mayer, Oscar
Op, et al. These chaps had
been practising all the season,
and, up to the time of the
first game, thought they were
"safoets" but the Grand Rajah
of Baseball graded 'em merely
as the "bacon" type.

The Sporting Editor annex-
ed a good one the other day:
A local ball fan, hearing some
rash person offer a bet that
our "big 5" team wouldn't
win a game, went to a clair-
voyant, who solemnly assured
the ball fan that June and
July were horrid periods for
the local aggregation, but in
the months following our team
would win every game. Look
at your schedule and see how
it works out.

'Tis said one of our promi-
nent golfers intends writing a
book the coming summer un-
der the caption "My Adventu-
res with the Paint Brush."

Give the Balltossers a Break.

In a letter to The Sun, H.
C.O. says: "While thinking of
ball practice, it might not be
a bad idea to remind golfers
of their pledge (or was it a
pledge?) not to play the sec-
ond hole while the diamond
is in use. A ball player, either
in a game or at practice, can-
not give his best attention to
baseball, when at the same
time he is worrying about a
few golf balls which might be
coming too close for comfort.
Give the balltossers a break!
They need it!"

Big Five Schedule.

The League's next game here is
on Sunday next, June 11, when A
and N Cubs clash with the local
boys. This game to follow this one
are:

Wed. June 11, Red Sox v Stony
Sun. 25, Cleaners v Stony
Wed. 23, Morrisville v Stony
Wed. July 5, Cubs at Stony
Wed. 12, Red Sox at Stony
Wed. 19, Morrisville v Stony
Games Played
May 23—Stony 5, Cubs 13
May 31—Stony 10, Cleaners 11

"CANADA" TEA

"Fresh from the Gardens"

Vacation Days.

Schools all over this western land will soon close their doors for the summer months and tens of thousands of boys and girls will joyfully welcome the "holidays."

In offices and shops week by week employers and employees will for longer or shorter periods relinquish their tasks to enjoy their hard earned summer vacation.

Work on the farms will ease up a bit following Spring activities and during the period while the crops grow and ripen for the harvest.

In a word, Western Canada's short playtime period is at hand. It is a time to forget, as far as that may be possible, the worries and difficulties of the months of depression, and for the younger generation in particular every reasonable effort should be made to make the next two or three months as happy and health-giving as possible, with life lived largely in the open.

There will not be much money to spend, and vacation plans will have to be made upon a cheap scale by most people, but that is no reason why these holidays should not be just as enjoyable as if planned in a much more elaborate and expensive way.

Long journeys in and out of the question, but fortunately Western Canada has been blessed by nature with an abundance and variety of lovely summer resorts and camp sites which can be reached easily and at little expense, and where the daily cost of living is extremely low. Such a vacation will serve to remove the strain and worry of school studies and exams, which youth has been undergoing, and blow away the fogs of the depression in which all people, young and old, have been living. It will mean renewed mental and physical vigor.

Fortunately, too, in this year when money is not a plentiful article wherever to make trips to other provinces or countries, opportunity is being afforded right in the heart of Western Canada for a holiday which combines all the essentials of an enjoyable, worthwhile respite from daily toil—a holiday that will provide relaxation, entertainment and thrills combined with educational features and opportunities never before offered in this Western country, and all at small expense.

Reference is to the World's Grain Exhibition and Conference to be held at Regina during the last week of July and the first week of August. This will be a truly wonderful exhibition, a magnificent enterprise. Over Forty nations, states and provinces will be represented in the specially constructed quarter of a million dollar building, having a floor space of 148,000 square feet, and actually miles of exhibits. It will not only a sight worth seeing, but a great education.

A vacation visit to this great exhibition, which will be the result of three years of intensive preparation, will not be a costly one. For the people of the prairie provinces, the distance to be travelled is short, and specially low fares on the railways will make the journey within reach of most people, even in these days of restricted finances. A huge city of tents will be built adjacent to the exhibition grounds, with modern facilities provided, where groups and families can stay at the very minimum of expense, and will constitute an ideal outing for motor parties from all over the land.

Western Canadians, old and young, need not deny themselves a real and enjoyable vacation this summer. They owe it to themselves to take all the enjoyment and recreation they can from the opportunities afforded them. They will be better for it, whether it be the spending of a lazy time at some camp or small summer resort, or a visit to the big world show at Regina. In any event they can get to know their own Western country better than ever before, and to appreciate it and its possibilities, and many of them can combine with it the obtaining of a glimpse of the world, and more especially of those nations which are engaged in the same major activity as the people of Western Canada, namely, agriculture.

So,—take a holiday. Pack the family in the old car and hike away to some new scene. Live in the open, rambling over the country side. Go fishing. Let the boys and girls paddle and swim, enjoy out-of-doors games, gather around the bonfire at night for an old time sing-song. Everybody will be the better for it.

Long-Lived Monarchs

None Have Occupied Throne As Long As Queen Victoria

King George recently attained the 23rd anniversary of his accession to the throne as compared with the nine years' reign of his father Edward VII. Counting from 1154 when the House of Plantagenet was established he is now exceeded in length of occupancy of the throne by twelve others: Queen Victoria, 63 years; George III, 59 years; Henry III, 56 years; Edward III, 50 years; Elizabeth, 44 years; Henry VI, 39 years; Henry VIII, 38 years; Charles II, 36 years; Edward I, 35 years; George II, 33 years; Henry VII, 24 years and Charles I, 24 years.

Rotating Reserve Plan

U.S. Navy Department Abandons This System

The rotating reserve plan by which Admiral William V. Pratt, chief of naval operations, hoped to save a large sum through keeping one-third of the United States fleet in reserve has been abandoned by the navy department because a study shows the savings would be only \$5,000,000.

Secretary Claude Swanson, of the navy, said that only the destroyers and submarines now on a rotating reserve plan would be laid up at any time.

Dickens delighted in ornamenting himself with costly jewelry.

Palpitation of the Heart Nerves Bad—Could Not Sleep

Mrs. Fred Bingham, Swift Current, Sask., writes: "I was bothered with palpitation of the heart, and my nerves were so bad I could not sleep."

I was getting desperate and confided my trouble to a friend who recommended me to use Milburn's Heart and Nerve Pills. I purchased a box and got such relief I would gladly recommend them to all who are troubled as I was."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Burning Ten Million Yearly

Figure Given As Forest-Fire Loss In Canada

Figures compiled by the Forest Service of the Department of the Interior show that the annual forest-fire loss in Canada for the ten year period 1922-31 was \$10,000,000. It is something that appals. Canada's forests are among the richest of her heritage, and the fact that we, the trustees of that heritage, should be sending it up in smoke at the rate of \$10,000,000 a year, is a blot upon our capacity as a people. The melancholy aspect of it all is that most of this fire-loss is the result of indifference, of a carelessness that will not heed warning of educational propaganda. We talk loudly about the exploitation of promoters and about the failures of the newsprint industry, yet all the time we permit or cause a condition which is doing more to ruin our forests than all the capitalists and greedy promoters combined. It is one of the discreditable things in our whole scheme of national economy—Ottawa Journal.

NURSE LOSES 7 LBS.

"I weighed 145 lbs.," writes a nurse "when I bought the bottle of Kruschen Salts which I have just finished. I have taken a good half-teaspoon in a glass of hot water every morning. Now I weigh 138 lbs., a loss of 7 lbs. I am very glad to have lost weight, especially without trouble." M.H.R. (Mother and Nurse.) Unlike most salts, Kruschen isn't simply a laxative. When you take Kruschen Salts you not only stimulate your liver and kidneys to function naturally and perfectly, but you supply your blood with iron, nerve and fibre in the body with Nature's own revitalizing and rejuvenating minerals. Get a bottle of Kruschen Salts today, and take one-half a teaspoon in a glass of hot water every morning before breakfast.

Before the bottle is empty you'll feel years younger—eyes will brighten—step grow sprightlier—nerves steadier—you'll sleep sound, enjoy your meals, and after a hard day's work you'll be ready for wholesome recreation—one million women already know all this.

World Meat Reserve

Experts Believe Reindeer Will Add Greatly To Supply

Experts believe that a great world meat reserve can be established in northern Canada, and that the millions of acres hitherto regarded as waste land will give the empire a useful and cheap addition to its meat supply. They expect that a vast business organization with a cold storage plant and transport installations will result from the successful migration of a large herd of Alaskan reindeer.

When the herd has developed sufficiently, the reindeer meat and reindeer tongue—held to be a great delicacy—will be exported. The animals will be of the greatest use, as they provide their own food, even in mid-winter. They are generally regarded as the most widely versatile animals in the world.

Turks Eat Little Meat

Quantities Of Rice, Bread, and Fish Constitute Meal

One of the best ways of getting to know a man or a nation is to study what he eats. The inhabitant of Constantinople is a big bread eater and a tremendous rice eater. Strangely enough, considering what a fighter he is, he does not go in for meat very much. He will devour at a single sitting huge quantities of boiled corn, Indian corn, stewed barley, haricot beans, lentils, and subergines. He cooks in olive oil and will eat fish of any freshness—just out of the sea or in the last stages of decomposition.

What He Wanted

"I don't know about granting you another divorce, Jake," the judge said. "You've had three already and if I grant you another you'll simply go and get married again."

"Oh, no, judge your honah," Jake protested. "I ain't figurin' on that 'tall-I-je' wants you to put me out of circulation."

"Did you sleep well, sir?" "Wonderfully! You remember I dreamed the night before last that somebody gave me a bad \$5 note? Well, last night I managed to spend it."

Background For Exhibit

Map Of Canada Will Be Flood-Lighted At Chicago Exposition

History was made in Montreal when Gordon Hammond, internationally famous scenic artist, saw his latest effort, the largest map in the world, a map of Canada in color, 30 by 130 feet, leave for the Century of Progress Exposition in Chicago where it will hang, framed and flood-lighted, as a breath-taking background for the Canadian exhibit in the great hall of the travel and transport building, in which the Dominion Government, the Canadian Pacific and the Canadian National Railways are participating.

The Canadian coat of arms in color, measuring approximately seven by eight feet and surmounted by the word "Canada" in huge cut-out letters, will hang from the centre of the map at the top and constitutes another record achievement in that it is the largest photographic enlargement made to date in the Dominion. The third record is that the complete map, models, dioramas, etc., have been completed in about three weeks, when ordinarily the job would have taken three months. The result has been a real triumph for Canadian artists, Canadian material and Canadian methods.

The huge map, of course, will be the main attraction, containing as it does farming and mining areas, national parks, both trans-continental railway systems on general lines, principal resorts and cities, and three large cartouches or inserts in which information concerning Canada as a land of opportunity for industry or tourists is presented in condensed form. Its message is easy to grasp, its huge size immediately impresses one with the vastness of the Dominion, and as one stands back from it, it is then that Mr. Hammond's ability becomes evident. One has the sense of being high above the earth looking down at a scene stretching from the Aleutian Islands in Behring's Seas to Iceland and from the Arctic to Southern Illinois, in which every detail appears.

Solves One Problem

New York Church Replaces Choir With Record Music

The problem of maintaining a choir when economic conditions prohibit has been solved by the Presbyterian Church of the Convent at New York.

Phonograph records of choir singing are played and amplified at the Sunday evening service. The congregation sings to the accompaniment of electrical transcriptions of the choir music from famous churches all over the world. It has been contended more elaborate programmes can be offered than it could present with its own reduced choir.

Employer: "You are, I suppose, strictly honest?" Applicant For Office Boy's Job: "Yes, sir—but at the same time I understand that business is business!"

Nearly ten million narcissus bulbs were grown in British Columbia in 1931, while an equal number of bulbs of other species were also grown for the domestic market.

Stamp Fraud Laid Bare

Clever Machine Discovered In Britain To Defraud Government

Infra-red ray, the remarkable scientific discovery which enables the camera to penetrate fog and darkness, has been the means of unmasking an astonishingly elaborate fraud on the inland revenue.

It is understood that Scotland Yard has been investigating the matter secretly for many months past, and it has now become evident that many thousands of pounds are involved.

The conspiracy to cheat the exchequer has been worked with complete success for years by a clever gang, who have found a means of obliterating the cancellation marks on the stamps issued by the post office for the payment of income tax.

Thousands of the stamped cards rendered by weekly wage-earners in payment of income tax have apparently been obtained by some means.

The stamps have been steamed off, subjected to a cleaning process which has removed every mark of cancellation, and then sold at half their original face value.

The inland revenue authorities had not the slightest cause for suspicion until months ago, when someone noticed that the stamps had peeled off one of the cards sent to Somerset House.

It was at first surmised that the gummer must be at fault. The cards and the stamps were sent to the firm concerned. The gum was analysed and found to be different from that they had applied.

Even then the fraud was not suspected, but when more and more examples of re-gummed stamps came to light, experts were consulted. They declared the stamps perfectly genuine, and the authorities remained mystified until some one suggested taking infra-red photographs.

Then the secret came to light. Numerous confessions have been obtained from income taxpayers who have admitted the purchase of stamps at half their face value from mysterious hawkers, and one after another of these hawkers have been found and interrogated, but the police have not been able to trace the reissued stamps to their original source.

Creation of "super sheep" giving more and richer wool, has been made possible through gland transplantation, Dr. Serge Voronov declared at Grimaldi, Italy.

Whalebone is not home at all, but an elastic substance found in the mouths of whales.

Johannesburg, South Africa, is to have modern streamline street cars.

National Research Council Reports On Relative Value Of Various Feeds For Livestock

The pressure of the disastrously low prices of grain now being experienced has driven many members of the farming community to seek more profitable returns, by feeding their produce on the farm and marketing it in the form of livestock. This in turn has caused increased interest in the relative utility and value of the different grains for various classes of farm animals. The information contained in the recently published Report No. 28 of the National Research Council "The Comparative Feeding Values for Livestock of Barley, Oats, Wheat, Rye and Corn" should therefore be of considerable practical value to farmers and stockmen at this time.

In a foreword to the Report Dr. R. Newton, Director of the Division of Biology and Agriculture of the National Research Council, states that the lack of authoritative published information on this question, and the desirability of summarizing the results of feeding experiments, particularly with regard to barley, a home-grown product, and corn, a product largely imported, was brought to the attention of the Associate Committee on Grain Research of the Council by officials of the wheat pools. Having ascertained that Professor E. W. Crampton of MacDonald College had already begun some work along this line, the Council made a grant to assist him in reviewing all the modern published literature conveniently available on the comparative value of barley, oats, wheat, rye and corn for feeding horses, cattle, sheep and swine. In this Report Professor Crampton makes available the results of his inquiry.

For the purpose of his survey Professor Crampton has consulted 360 published accounts of feeding experiments conducted in 7 provinces of Canada, 29 States of the Union, and 8 overseas countries. Whenever possible quantitative data respecting gains and feed consumption have been extracted from these accounts and tabulated according to the grain comparison and class of stock involved. It has thus been possible to arrive at average figures for rates of gain, gain per 100 lbs. feed eaten and other measures of efficiency, representing the combined experience of numerous different investigators. A statistical method has been employed to test the significance of all observed differences between the grains compared.

An encouraging feature of the findings is the indication obtained that in general the grain feeder is not handicapped by the lack of corn for fattening steers. Wheat actually appears to be more efficient than corn for hog fattening. The other grains however, suffer somewhat by comparison with corn in this connection, and for sheep fattening all, including wheat, appear to be inferior to corn. In general the difference in efficiency seem to be roughly proportional to the amounts of fibre contained in the various feeds. Special characteristics, particularly in the case of rye, also limit to determine the usefulness of the several grains for special purposes or for certain feeding classes. The value of the Report to investigators is increased by a section in which Professor Crampton discusses the planning and reporting of stock-feeding experiments in the light of the lessons to be learned from the numerous trials examined in the course of this study.

A comprehensive summary of the findings which are discussed in detail in the body of the report is provided. Whilst it is anticipated that the report, as a whole will probably be of interest mainly to investigators, this summary (which is being reprinted separately) contains in brief form much information of value and interest to practical stock men.

The report or the summary may be obtained upon application to the National Research Council or the Federal Department of Agriculture, Ottawa.

W. N. U., 1937

Transportation By Air

Aeroplane Makes Possible Industrial Development In Remote Areas

It is now about seven years since the aircraft of a type which could be considered at all efficient were made available in Canada for the transportation of equipment and supplies into the mining areas.

Since 1926—the year of the Red Lake rule—a steadily increasing use of aircraft has resulted in yearly augmented totals of mileage hours flown and freight carried.

Despite the fact that the eastern inter-city and prairie air mail services were discontinued in March, 1932, a comparison of the yearly totals for 1931 and 1932 shows that Canadian Airways alone carried nearly 80 per cent. more freight and express during the latter year and more passengers despite the fewer hours and mileage flown.

This increase is largely accounted for by the activity in the Great Bear area and whatever the future of Great Bear may be, it has at least served one purpose well—demonstrating to the public that provided the facilities afforded by aerial transportation are available, no part of this Dominion is too remote for industrial development.—(W. B. Burchall in the Financial Post.)

Would Honor Captain Bernier

Parliament Likely To Recognize Services Of Veteran Arctic Explorer

In the Senate recently the Hon. J. P. B. Casgrain made the proposal, which was promptly endorsed by the Government leader, the Rt. Hon. Arthur Meighen, that Parliament should make suitable recognition of the services performed by Captain J. E. Bernier, the veteran Arctic explorer, who has contributed greatly to the knowledge possessed by Canadians of the value and extent of their Arctic resources. Captain Bernier is now in his 82nd year, old as far as age is counted, but still as interested as ever in the Canadian Arctic and its resources. He went to sea for the first time when only twelve years of age and he continued to sail as long as health permitted, for many years with the Arctic regions as his destination. Important public service was rendered by him in the course of his periodical voyages into northern waters, sometimes with the object of formally taking possession of certain lands in the name of the Dominion, and at one time he planned an independent Canadian expedition for the discovery of the North Pole. There are very few people who know as much about the Canadian Arctic regions as Captain Bernier.

Joint Commission On Conservation and Afforestation Hold Meeting at Regina

The Joint Commission on Conservation and Afforestation of the prairie provinces, held its inaugural meeting in the Parliament Buildings recently in Regina.

There were present the following members of the Provincial Commissions on Conservation and Afforestation: Representing Saskatchewan—Hon. James P. Bryant, W. D. Cowan, M.D., M.P., Professor C. J. MacKenzie, Dean of Engineering of the University of Saskatchewan and T. A. Patrick, M.D., Yorkton, representing Alberta—Hon. R. G. Reid, Provincial Treasurer and Minister of Natural Resources for Alberta, representing Manitoba—C. H. Attwood, Deputy Minister of Natural Resources and Industries, Col. H. J. Stephenson, Provincial Forester and Professor J. H. Ellis, Professor of Soils, Agronomy Department, University of Manitoba.

It was agreed to establish a joint Manitoba, Saskatchewan—Alberta Commission, with the provincial committees collaborating under one chairman. It was distinctly understood that the joint committee functions in the matter of assembling and acquiring data in a co-operative way only and does not bind the respective provinces to any individual action but exists only for the purpose of making recommendations.

Hon. James P. Bryant, Chairman of the Saskatchewan Commission was elected chairman of the joint commission. The Commission then drew up an agenda and discussed the following matters in relation to the work to be undertaken:

1. Climate.
2. Afforestation.
3. Conservation, under the following heads: (a) Water; (b) Forests; (c) Soils; (d) Scenic beauties; (e) Game; (f) Fish; (g) Bird life; (h) Fur bearing animals.
4. Drought problems and how to meet them.

The following programme was adopted as the aims and objects of the joint Commission.

Aims—1. To institute a scientific research of climatic conditions in the prairie provinces.

2. To apply the results of said research to the problems facing each community in the western provinces with particular reference to provincial administration with respect to industrial development, as it relates to agriculture, forestry, game, fur bearers, fisheries, land settlement and water resources.

The objects of the joint commissions work are:—(a) Conservation of water; (b) Prevention of erosion and soil drifting; (c) Soil survey and land utilization studies; (d) Shelter belts, location and types; (e) Reserving for forestry purposes all areas unsuited for agricultural purposes; (f) Forestation of areas

unsuited for agricultural purposes; (g) Conservation of forests and thereby providing shelter and preservation of game, fur bearers, recreational areas and industries depending on the forests and forest products.

Stress was laid on the importance of the soil surveys in relation to settlement, and also in particular with regard to the type of tree species to be recommended for each locality.

The joint commission made several recommendations which were passed on to the provincial commissions for study and experimentation, among them the removal of different species of trees on sandy soils where the water table was low and also species suitable for soils where the water table was high and drainage good.

The following among other resolutions were passed:

"That any area which is not suitable for agricultural purposes be withdrawn from settlement and reserved for forestry purposes, and that the several provincial Commissions be urged to study the feasibility of forestation of such areas as seems suitable, the work being especially called to the desirability of planting or continuing in forests the headwaters of all streams."

"That this joint Commission on Conservation and Afforestation desires to place on record its appreciation of the splendid work carried on by the forestry farms under the Federal Government. The Commission recognizes with appreciation the leadership in the matter of tree planting in the prairie provinces given by Norman M. Ross, of Indian Head, Chief of the Forestry work in Western Canada. The joint Commission also desires to express appreciation of the splendid educational work in the matter of tree planting being done by the Canadian Forestry Association through their tree planting car."

"That this joint Commission appreciates the co-operative effort in the matter of soil survey between the Dominion and the provinces and urges that this work be continued and extended as much as possible."

The following joint sub-committees were formed to study, assemble and exchange information on the following subjects:

Committee on Soils—Professor J. H. Ellis (Manitoba), Professor Joel (Saskatchewan), and Professor F. A. Wyatt (Alberta).

Committee on Forests—Hon. James P. Bryant (Saskatchewan), Col. H. J. Stephenson (Manitoba), and T. F. Biegan (Alberta).

Committee on Water—Dean C. J. MacKenzie (Saskatchewan), C. H. Attwood (Manitoba), and Dr. Ruth-erford (University of Alberta).

It was agreed that as work was carried on and results obtained, all data should be made available to the central Committee so that the provincial Commissions can keep in touch with one another and obtain all data available.

Some Truth In It

European Women Old-Fashioned and Therefore May Be Better Off

Mrs. Andrea Collin, one of the few women executives on the League of Nations staff, believes her European sisters are better off than United States women because they are old-fashioned. "Because women in Europe have kept so very much to the old-fashioned women's way of life they are much less affected by current economic conditions than your women here," she said. "The young woman of Europe looks to getting married as a goal in life, not to doing big jobs and careers. I do not see young mothers for office workers. One of two things suffer, the husband or the job."

Register office marriages are more popular in England each year there being 100,000 such unions yearly.

It takes sap from two or three apple trees to make a gallon of apple

CANADIANS HONORED AT MCGILL CONVOCATION

A number of prominent Canadians were honored at the McGill Convocation by the conferring of degrees. Perhaps the most prominent recipient was His Eminence Cardinal Villeneuve, Roman Catholic Archbishop of Quebec, who is shown above with a number of prominent personages at McGill University. Front row, left to right: Bishop Farthing, Anglican Bishop of Montreal; His Eminence Cardinal Villeneuve, and Senator Hon. A. J. Brown. Second row, in mortar boards, E. W. Beatty, President of the Canadian Pacific Railway, who is Chancellor of the University; Sir Arthur W. Currie, and on his left in gown, Mr. John Ross, Back row, Col. Herbert McLean, W. A. Black, Hon. Vincent Massey, who also received the degree of Doctor of Laws, and Mr. Henry Birks. In the doorway is Mr. Huntley Drummond.

WORLD HAPPENINGS
BRIEFLY TOLD

The Bank of England recently bought \$343,200 in bar gold.

Flying time of the London-Cape Town air mail has been cut from 11 to 10 days for the 6,000-mile trip.

Proclamation has been issued by the Dominion government extending the Canada-New Zealand trade agreement for six months from May 24.

Forty-three cases of material for the national exhibit of the kingdom of Siam at the forthcoming World's Grain Show, has reached Regina.

The Manitoba Government is richer by \$2,845, which was realized in the auction of hay cutting privileges on crown marsh lands of the Red River delta north of Selkirk.

Allan C. Fraser, of Calgary, has taken over his new duties in Ottawa as managing secretary of the National Dairy Council of Canada. Mr. Fraser succeeded W. P. Stephens.

The Germans broke all records for air mail from Europe when the Graf Zeppelin's mail was delivered at Buenos Aires four and one-half days after it had left Friedrichshafen, Germany.

After an absence of three years, liquor advertising is to be permitted in Manitoba. The Manitoba government liquor control commission has rescinded the order banning liquor advertisements, it was announced.

Unless outside interests decide to set nets for commercial fishing in the Churchill waters this summer, no catches will be made this year, according to fishermen at The Pas, Man.

Any German desiring to visit Austria must pay 1,000 marks (\$270) for a visa hereafter. This is a retaliation by the Hitler Government for repressive measures against Nazis in Austria.

A Simple Resuscitator

Double Can Device Rocks Patient and Restores Breathing

A simple resuscitator which creates respiration in newly born babies and restores breathing to adults by the simple process of rocking the patient in a double can device has been developed at the Shreveport Charity Hospital in Arcadia, Louisiana.

The front end of the double can has a hole and rubber collar to allow the patient's head to protrude. The inner cylinder is an air chamber while the air between the inner and outer can is partly filled with warm water. The upper side of the inner can has a hole that allows passage of air which is increased or decreased by pressure of the water as the can is rocked.

As explained, the air is compressed into the air chamber as the can is rocked upward and the vacuum motion causes a partial vacuum. The changing of the air pressure has the same effect upon the chest, as hand pressure system used by swimming resort lifersavers.

Additional advantages were that the water warms and moistens the air and the blood circulation is stimulated by the rocking.

Cannot Lower Banner

Religious Sect In Calcutta Paid Well For Protection Of Principles

So that their banner might never be lowered, in accordance with their principles, a religious sect known as the Jains, paid telephone and street car officials of Calcutta, India, \$2,500 to cut off the overhead wires during the recent procession of the faithful. The banner is 60 feet high and always heads their processions, and must never be dipped at any time or any place. The sect traces its religion back to 600 B.C. It has beautiful temples in one of the way mountain spots. The one in Calcutta is famous for its many mirrors.

Might Use Rubber Map

The home service department of a large electrical company received this note from a woman customer: "I have a pet dog which insists on chewing the electric lamp cords. If he ever bites through a cord and any of the juice leaks out will I get a shock if I mop it up?"

Bargains In European Tours

Cheap Rates Making It Possible For Many Canadians To Make First Trip To Old Country

(By E. L. Chisholm)

A great many Canadians who all their lives have thought and talked vaguely of going to Europe some time and who have year by year relegated this expectation to an indefinite future, are this summer realizing their ambitions. This is the first time since the war that the travelling agent's early departures of Cunard liners from Montreal and analyzing the bookings for the season. A surprising number of those who will sail down the St. Lawrence on their way to Europe in the course of the present summer are making their crossing of the Atlantic for the first time.

Despite the continuance of unsettled economic conditions, reduced incomes, and restricted luxury purchasing, the realization has come home forcibly to many people that this is the year to make that European trip if it is ever to be made. Not since the war has it been possible to tour Europe so cheaply. It seems doubtful if after present economic troubles are straightened out it will ever again be possible to do it at such low cost. And so those appreciating the opportunity and able to do so are seizing it.

Imagine being able to bid a care-free farewell to this continent, for thirty-one entire days, enjoy a luxurious river and ocean voyage, and see all that is loveliest and most interesting in Europe for as little as \$205.50!

Thirty-one delightful summer days, a secure and comfortable voyage, the village-dotted shores of the St. Lawrence River, of comfortable ocean travel in veritable floating hostels, of touring in comfort in motor coaches through the choicest sections of England, Belgium, Holland and France—\$205.50!

The amazing feature of the arranged tour, in addition to its economic value, is that it is a pleasure and visiting that can be crammed into the limited extent of time. With in the space of the month at his disposal, the trans-Atlantic traveller can discover a surprising amount of territory and visit virtually all those romantic and historic localities which he has long dreamed, which he would probably list if he were making a trip to his account, of indefinite duration. Certainly he returns completely satisfied, with adequate appreciation of the countries he has visited, satisfied that he has spent his time to the best advantage.

For the traveller venturing alone to secure so comfortable a picture of such satisfaction is possible in the time at his disposal. The less than twenty days he actually spends in Europe are scarcely more than sufficient to make a commencement on all he would like to do. He discovers travelling over so much more complicated than at home. Left to his own devices with so many places he wants to see he finds himself more or less in a daze, wondering where to commence and how to proceed. At times he loses precious minutes of his holiday time.

When he goes on an arranged tour things are very different. Apart from the fact that he is accompanied throughout the trip he has the most congenial company in which to travel, takes the time to be acquainted with the most absolute precision so that all those places he most wants to see are squeezed in without a minute's waste of time. He steps from the boat upon Europe's soil to find a motor coach waiting for him and thereafter there is no more of the offing to transport him without loss of time through the romantic and picturesque countryside. He is reversed so it has been lifetime's dream to visit to another, which will be a cherished memory for the remainder of his days.

Take, for instance, the 31 day tour of which mention has been made, typical of others which are expanded up to three times its length. The amount and variety of sightseeing crowded into it is at first unbelievable when it is adequate time is spent to visit under the most of the time must be spent in voyaging to and from Europe. The Canadian visitor making such a first return to Canada with a more diversified knowledge of England than the average Englishman has, having visited many parts of France unseen by the majority of French people, the average Englishman of Holland and Belgium, unpossessed by the greater number of the inhabitants of those countries.

On leaving London alternately at Plymouth, romantic old south of England port, where legend has it Drake impudently carried his game of bowls when informed of the approach of the Spanish Armada, or Liverpool, the great shipping centre on the Mersey River. Then the traveller's eye is fixed on Mecca, London, centre of Empire.

One route takes the comfortable motor coaches through lovely Devonshire, one of England's fairest counties, to Torquay, one of the most attractive of English spas, so sheltered it basks in a luxuriant sub-tropical vegetation. After a day at this beautiful resort he passes on through Exeter with its lovely Cathedral, Shaftesbury, Wilton, Salisbury with another magnificent cathedral, Stone-

It pays to "Roll Your Own" with
TURRET FINE CUT
CIGARETTE TOBACCO
SAVE THE POKER HANDS

enge, most famous Druid temple, Canby, Sagahot Heath, and so to London.

The other route takes the traveller to the historic old city of Chester, with its ancient cathedral, its time-worn city walls and other old Roman remains, Thence he journeys through Shakespeare's country, shrine of all lovers of English literature, through picturesque Warwick with its handsome castle, Kenilworth, reminiscent of Elizabeth and Amy Robsart, Guy's Cliff, Leamington, popular inland spa, Oxford, city of spires and centre of learning, Windsor with its stately castle, Hampton Court with its exquisite gardens, to London.

A few days are spent in London, a mere taste of its delights it is true, upon which one could feast for months, but suffice it under expert management to cover the main points of interest the Canadian wishes to see, including the Tower, the Guildhall, Tower of London, St. Paul's Cathedral, Westminster Abbey, the Horse Guards, the Tate Gallery, and other art galleries and museums.

To leave for the continent the tourist makes for Dover. To reach it he passes through one of the most interesting sections of England, including Kent, which is a veritable garden. Rochester is visited, a picturesque city immortalized by Dickens in his Pickwick Papers. Continuing on Canterbury is reached, a wonderful old city built in 1200, with its famous old cathedral and the shrine of Thomas a Becket. Then by countless less than a mile, to Dover, and the English Channel. Here he boards the little steamer which lands him a few hours later at Ostend, the celebrated Belgian resort with its fine beach and casino.

From this point a full day's tour takes the tourist through Holland to the old town of Middelburg, through countless quiet villages and the charmingly distinct Dutch landscape. Another excursion from Ostend is to Bruges, the 14th century commercial centre of Europe, a veritable town built with its more than fifty canal bridges; Ghent, a city famed alike for its many interesting old buildings and its cotton, linen, and horticultural industries; Brussels with its lovely boulevards, botanical gardens, museums, and public buildings.

Making a final departure from Ostend that part of France of keenest interest to Canadians, the Battlefields area, is visited via Menin, Lille, Arras, and Amiens, as the comfortable motor coach rolls on to Paris. Here adequate time is spent to visit under the most of the time must be spent in voyaging to and from Europe. The Canadian visitor making such a first return to Canada with a more diversified knowledge of England than the average Englishman has, having visited many parts of France unseen by the majority of French people, the average Englishman of Holland and Belgium, unpossessed by the greater number of the inhabitants of those countries.

On leaving London alternately at Plymouth, romantic old south of England port, where legend has it Drake impudently carried his game of bowls when informed of the approach of the Spanish Armada, or Liverpool, the great shipping centre on the Mersey River. Then the traveller's eye is fixed on Mecca, London, centre of Empire.

One route takes the comfortable motor coaches through lovely Devonshire, one of England's fairest counties, to Torquay, one of the most attractive of English spas, so sheltered it basks in a luxuriant sub-tropical vegetation. After a day at this beautiful resort he passes on through Exeter with its lovely Cathedral, Shaftesbury, Wilton, Salisbury with another magnificent cathedral, Stone-

Razor Blades FREE
with POKER HANDS!

You can get these five keen, well-honed safety razor blades (fit any Gillette-type razor). Given free for just one complete set of Turret Poker Hands... any man would appreciate such a gift!

Mild, yet sweet and full of flavour—Turret Fine Cut is a particular favourite with men who "roll their own." A 20 cent package of this mellow Virginia Tobacco will make at least 50 cigarettes... in it are combined satisfaction and genuine economy.

the progress of the world's material affairs they can more easily take time than they could in the hectic days before 1930, or than they will be yet, unless when adjustments to conditions under way are concluded and the wheels of industry resume their normal turning and grinding.

That is why one hears of so many Canadians making their first trip to Europe this summer. They are real economic heads—these happy individuals are seen climbing the gang plank of each Cunard majestic liner about to depart from Montreal—who gaily wave farewells from the rail as the tug strains at the hawser and the vessel speeds into the river. They are spending their money and spending it wisely, getting the fullest possible return in travel pleasure.

SUNDAY SCHOOL LESSON

JUNE 11

JESUS ON THE CROSS

Golden Text: "God commendeth His own love toward us, in that, while we were yet sinners, Christ died for us."
—Romans 5:8

Lesson: Mark 15:1-47.

Devotional Reading: Isaiah 53:1-6.

Explanations and Comments

Simon Of Cyrene Compelled To Carry the Cross, verse 21.—"There were two kinds of crosses; the 'Crux Immissa,' a mere staff on which the victim was impaled, and the 'Crux Compacta,' which had three forms: (1) the 'Crux Decussata' or St. Anthony's Cross; (2) the 'Crux Commissa' or St. Anthony's Cross; (3) the 'Crux Immissa.' The last was the most common, and it was on this cross on which Jesus suffered. The victim carried his cross, at least the transverse beam, to the place of execution."—David Smith.

The Crucifixion, verses 22-27.—"The crucifixion was a punishment to which Jesus was brought to be crucified at Golgotha in Greek, and Calvary in Latin, words which mean 'a skull,' for it was skull-shaped. It was customary to give one about to be crucified something to stupify him, and Jesus was offered wine mixed with myrrh, but He refused it. He had work yet to do, Luke 23:39—43; John 19:28, 27. There they crucified Him."

Jesus' garments, as was the custom, were the perquisites of the executioners. His headgear, shoes, outer garment, and girdle, furnished an article for each of the four, and then the seamless inner garment was drawn by lot. The Gospel of John, therefore he had the inscription written so as to annoy the priests who, as he expected, considered it an insult to themselves: see John 19:21, 22. On each side of Jesus a robber was crucified. Many ancient authorities insert here verse 28 of the Authorized Version: "And the Scripture was fulfilled, which said 'And He was reckoned with the transgressors.'" Luke 22:37, R.V.M.

Jesus Of Nazareth, verses 29-32.—"The cross was erected where all that passed by could see it, and they taunted Jesus with having said that He would destroy the temple and build it in three days, and, since Jesus was His power, why did He not save Himself and come down from the cross."

Demand for homes in Sydney, Australia, is greater than the supply.

Working Model Of Elevator

Interesting Feature To Be Shown At World's Grain Show

A feature of the exhibit which the Saskatchewan Wheat Pool is preparing for the World's Grain Show, to be held at Regina in July and August, is a full working model of a modern terminal elevator. This is an attractively miniature of Pool Terminal No. 4 at Port Arthur, which has a total capacity of over 6,500,000 bushels of grain.

The model, painted ivory, consists of workhouse and storage annexes, boiler house, truck shed and railway trackage. In addition there will be a model boat—a typical Great Lakes grain carrier—alongside the dock, loading up from the shipping spouts, thereby lending an additional touch of realism to the picture.

This will be an excellent opportunity to learn just what happens to Western Canada's wheat when it enters one of these big terminal elevators, for by means of an electrically driven motor the main handling process may be followed with ease. Some of the storage annexes are shown in section to indicate their construction, while a good view may also be obtained of the horizontal and vertical grain conveyors in action. The conveyors are accurately reproduced even to the numerous buckets attached to the belts.

The dimensions of this model terminal are 77 inches by 36 inches, the height of the workhouse being 17 inches and of the annexes, 13 inches.

Competing For World's Honors

Women Athletes Will Enter British Empire Games In 1934

The biggest gathering of women athletes ever known is to take place in London, England, in 1934. Events for women are to be included in the British Empire games, which take place in August next year, and representatives of every part of the empire will attend.

The women's world games are being held in London in the same month, and it is hoped that most of the British athletes will stay for the international gathering. Mrs. Muriel A. Cornell, secretary of the women's amateur athletic association, said recently: "We expect that from 20 to 25 nations will send women to the world games. Each will send a dozen representatives and more if they wish."

Went Into Reverse

A stroke of lightning which struck the residence of L. W. King, at Newman Grove, Nebraska, so affected the electric clock in the home of Arnold Widgerren a half block away that the hands of the timepiece started going counter-clockwise. Until it was fixed some time later, the hands continued their backward course.

Many unemployed men in Aldrie, Scotland, have offered to donate their labor in making a new park and in putting the present ones in good condition.

HEIR TO THRONE DEPLORES POLICY OF ISOLATION

London, Eng.—The Prince of Wales told a distinguished Anglo-American gathering of the Pilgrims Society that the United States and Great Britain are now realizing "no country can prosper in isolation."

The heir to the throne introduced Robert W. Bingham, a new United States ambassador to the court of St. James, to the 250 persons The Prince paid tribute to the "strong lead" the new United States government has taken to end the depression.

The Prince of Wales said "recent world conditions had caused 'untold suffering, but citizens of the United States have renewed confidence and hope."

He plunged into the realms of economics and world affairs in his address, declaring "in the great catastrophe which has overtaken the world, America is realizing with Great Britain that under the present economic system no country can prosper in isolation."

He talked of the growing independence of nations and said "if the depression can be taken as the vice of economic nationalism, then the great depression itself may prove the opening of a way to the ideal day when there will be no poverty."

The Prince stressed the importance of the disarmament conference and the coming world economic conference, saying the degree of their success may well depend upon the co-operation of the United States and Great Britain.

Mr. Bingham was given an unusually warm welcome when he rose to speak. The guests, including the Archbishop of Canterbury, stood and applauded before drinking Mr. Bingham's health.

Quoting a passage from Mr. Roosevelt's inaugural address—"The only thing we have to fear is itself"—Mr. Bingham said "from the moment that inaugural address went out to the whole listening nation, the sombre clouds of despair began to lift, paralysis of fear was replaced with hope and courage and with uplifted minds and hearts the whole people accepted a leadership, bold, wise, statesmanlike and inspiring."

"What has happened since then is really incredible," he continued. "But what perhaps is of more importance to you is the phenomenal recovery which has been made which indefinitely enlarges the influence which the United States has to offer in behalf of world peace and world recovery and, also vitally important, the changed attitude on several subjects by the people of the United States through their misfortunes in recent years."

"This change—must be understood by anyone who seeks to measure the future of the American government and the American people," he said.

Discussing what he described as a changed attitude of Americans, Mr. Bingham said: "I shall give you one concrete example. For years the majority of American people believed that the higher the tariff, the higher wages and the general level of prosperity in the country would be. Now they have learned the grim lesson that with the highest tariff the country has ever had, more than 13,000,000 people have no wages at all."

"By bitter experience they have learned how unfounded this tariff doctrine is. They have learned how impossible it is to continue selling when they do not buy and they at last are prepared, through proper agreement, to lower tariff barriers so that international trade may begin to move again."

Mr. Bingham summed up the Roosevelt administration's foreign policy as that of "a good neighbor." He declared the message recently delivered in Geneva regarding neutrality "marked a definite departure from certain principles maintained by the United States since the nation was founded."

"It is a great step forward towards maintenance of the peace of

Central Wheat Production

Western Provinces Have Pledged Support To The Principle
Winnipeg, Man.—Governments of the three prairie provinces have pledged their support for the principle of curtailing wheat production or controlling exports for the purpose of stabilizing prices, and have offered to co-operate with the Dominion Government in achieving such an objective. The proposals are contained in a wire to Premier R. B. Bennett, forwarded by representatives of the three provinces this week.

The proposals particularly stressed the desirability of an agreement being reached at the World Economic Conference in London, England, between the wheat-exporting countries of the world, to become effective in the marketing of any crop handled after July 1 this year.

"The world," he asserted, "it does contain a reservation similar to the reservation retained by Great Britain in the Locarno Treaty. But, from my standpoint, I do not believe there is a 10-year-old child of average intelligence anywhere in the world who could fall, in event of war, to select instantly the aggressor."

"I do not now speak to you pessimistically," Mr. Bingham went on. "This is not time for pessimism but for faith and courage. But I am convinced civilization is trembling in the balance. I do believe that a general war will certainly destroy it."

"Moreover, I believe that civilization, as we have known and enjoyed it, cannot exist much longer unless the burdens which oppress mankind are lifted soon. In this, the great crisis of human history, I repeat, I believe the foundation of hope of our world lies in whole-hearted concerted action between Great Britain, the great self-governing British Commonwealth, and the United States."

World Postal Union

Executive In Session At Ottawa
Settles Vexed Question

Ottawa, Ont.—The question of the amount to be paid countries carrying mail intermediate from origin and destination has been settled by the executive of the World Postal Union in session here. It was agreed to recommend to World Postal Congress which meets in Cairo next year, a modest reduction be made in the amounts paid, to carrying countries other than nations in which the mail originated or to which it was destined.

The question has been a concern of the Union since its inception. Closer uniformity in postal rates was also agreed upon. The universal rate is theoretically 25 centimes in gold. The allowable deviation above this was recommended as being reduced from 50 to 40 per cent. The allowable rate is below 20 per cent.

The delegates here are preparing the agenda for the World Postal Congress to be held in Cairo next year and will be in session for more than six weeks.

Disease Is Depleting Herds

Strange Malady Killing Off Moose In Northern Manitoba

The Fur, Man.—A disease, unknown to trappers and Indians of the Grand Rapids country east of here, is killing off a large number of moose, according to word brought here by Valentine McKay. The malady has depleted the herds in the neighborhood of the head of Lake Winnipeg.

Caribou, on the other hand, have not suffered, according to bushmen. The caribou are said to be in good shape, and have plenty of feed. They are starting their northward migration, and many have been seen moving to summer feeding grounds during the past few weeks.

Defective Ties Blamed

Raynes Park, Surrey.—A coroner's jury inquiring into deaths of five persons, including Roderick Duthie, 11, a Vancouver-born boy, killed in the derailment of a train here, returned a verdict of accidental death. The jury added a rider to the verdict, however, attributing the accident to failure in packing of the ties along the track.

MADE PREMIER

Hon. L. P. D. Tilley, who succeeds Hon. C. D. Richards as Premier of the New Brunswick Legislature. The Conservatives chose Mr. Tilley to be Premier as Mr. Richards is to be appointed to the King's Bench Division of the Supreme Court of New Brunswick.

Export Balance

Canada Shows Excess Of Exports Over Imports Of Large Figure

Ottawa, Ont.—Canada, as an international trading corporation issued a balance sheet for 1932 operations, reporting a net export balance of \$623,000,000. Exclusive of capital movements, it showed an excess of exports over imports of \$72,000,000.

Commodity trade alone showed an export balance of nearly \$80,000,000. In the invisible trade column—tourist traffic, interest payments, etc.—there was an import balance of \$123,000,000. Deducting net gold exports of \$67,000,000 and the commodity export balance from the invisible import balance left a net export balance of \$623,000,000 for the year.

In net commodity trading, considering deductions for settlers effects and other non-commercial imports, exports totalled \$496,275,000 and imports \$416,586,000.

Considering sale and purchase of securities, maturities and direct investments, the net outflow of capital totalled \$23,000,000 which represented the country's net export balance for the year.

Security transactions represented an export total of \$100,000,000 and an import total of \$100,000,000. Maturities added \$75,000,000 to the import side of ledger. Direct investments totalled \$2,000,000 leaving the net capital outflow at \$623,000,000.

In issuing the statement, the Dominion Bureau of Statistics explained that there were wide variations in the total debts and credits, due to the necessity of estimating such items as tourist traffic.

Bread From New Wheat

Grandfield, Okla.—Loaves of bread from this year's first wheat have been sent to President Roosevelt and Governor William Murray by air mail.

Arctic Murder Trial

Eskimo In Coppermine River District Charged With Killing Native
Edmonton, Alberta.—The first murder trial since his appointment last year as stipendiary magistrate for the Northwest Territory, will be held at the mouth of the Coppermine River next month by J. M. Douglas.

At this hearing, an Eskimo named Ah-Ig-lak, will be tried on the charge of having killed another native named Arnauk. The crime, said to be an another instance of the eternal triangle, was committed a year ago on the mainland, immediately south of King William Island.

According to police reports, the accused is alleged to have committed the crime through fear and jealousy. Arnauk had made improper advances to Ah-Ig-lak's wife, it was claimed.

Owing to the remoteness of the northern ports, word of the crime was not received by the R.C.M.P. until some months after it occurred. Then Constable A. S. Wilson set out from Cambridge Bay and later arrested Ah-Ig-lak, who was a member of the Sherman Inlet Eskimos, who are on Adelaide Peninsula.

Mr. Douglas will leave the city on June 13 for the north. He will travel by boat to Fort Norman, at which point he will board an aeroplane for Great Bear Lake. At that point another machine will continue the flight to Coppermine River.

Favors Gold Standard

Prof. Gregory Urges Return To Gold By Nations Of The World

Vienna.—Delegates to the seventh congress of the International Chamber of Commerce showed their first real burst of enthusiasm when Prof. T. E. Gregory, of Great Britain, urged the nations of the world return to the gold standard. All attempts to manage a paper currency have only made a bad situation worse, Prof. Gregory declared. He said individual nations are timid about returning to gold because each fears others will make use of the opportunity to obtain special advantages.

The way to overcome this fear, the British representative told the congress, "is the same as overcoming fear of a lonely road—we must all take the road together."

Other speakers shared his views, but Eliot Wadsworth, of Boston, Mass., warned the congress to remember that the gold standard really is "99 per cent. confidence and one per cent. gold."

Mr. Wadsworth said he would prefer to emphasize balancing budgets and restoring to its pedestal the old maxim, "as good as a government bond."

Seeking Trade With Russia

New York.—Trade discussions between the United States and Russia, looking toward an enlargement of the export market for American agricultural products, will take concrete form very soon. They will centre largely on cotton and livestock—two of the Soviet Union's prime needs.

HOPE TO REACH AGREEMENT TO LIMIT ACREAGE

London, Eng.—Hon. G. Howard Ferguson, Canadian High Commissioner in the United Kingdom and chief Canadian delegate to the wheat conference here, told the meeting that before committing his country to a policy of wheat acreage restriction, he must await the arrival of Prime Minister Richard B. Bennett, who is leaving Ottawa to attend the World Economic Conference opening June 12.

The threat to the success of the wheat restriction agreement, which is seen in the announcement from Sydney that Australia will not participate in an accord to limit acreage, failed to disturb the hopeful attitude of the delegates.

Stanley M. Bruce, the Australian High Commissioner, announced at the first formal session of the four-power conference that his government could not participate in a proposed international scheme for limiting production of the cereal.

The United States delegates are understood to take the view that Australia is bargaining for an arrangement whereby that country would not have to restrict production as drastically as Canada and the United States.

The harmony between Argentine and the other great wheat-growing countries, which developed at Geneva in the earlier discussions, became more apparent here as the Argentine spokesman expressed his willingness to co-operate to the fullest extent in solving the question of world grain surplus.

Judge Stubbs Retired

Order-In-Council Is Passed By Ottawa Cabinet

Ottawa, Ont.—Dominion cabinet passed an order-in-council retiring Judge Lewis St. George Stubbs, of Winnipeg. It did not name his successor.

The Ford report found Judge Stubbs guilty of misbehaviour on four separate charges. The order-in-council then says: "The commissioner has made specific findings of misbehaviour within the meaning of section 31 of the Judges act, and that after very careful consideration of these findings and of all the circumstances and considerations appearing from the commissioner's report, the minister (Mr. Cahan) cannot avoid the conclusion that as the commissioner, whose ability and impartiality is unquestioned, has found in honor Judge Stubbs, guilty of misbehaviour in office, your excellency-in-council should forthwith give effect to these findings."

Truce Has Been Signed

Combatants Arrange Formal Armistice In North China Warfare

Shanghai, China.—A formal armistice in the North China warfare has been signed by military representatives of China and Japan at Tangku.

The truce provides first for the demilitarization of the area bounded by the Great Wall on the north, the Peiping-Mukden Railway on the east, and the Peiping-Suiyuan Railway on the west. Second, the dissolution of the Chinese volunteer corps in this area; third, the resumption of rail traffic between Peiping and Shanghai.

Refuses To Arbitrate

Geneva, Switzerland.—League of Nations received a communication from Bolivia, which, it was said, constituted non-acceptance of the league's proposal to settle the dispute with Paraguay over the Chaco by sending a commission to establish basis of arbitration.

Crop Conditions Promising

Ottawa, Ont.—Report on the prairie crop conditions issued by the Dominion Bureau of Statistics recently, declares that the spring season is generally reported as a little late but very promising. General soil moisture conditions are particularly good, perhaps the best since 1928.

Earl Beatty, Admiral of the British Fleet, was photographed above as he expressed interest in the dresses of the ladies who will take part in the colorful Greenwich Night Pageant held by the British Royal Naval College in June. The ladies are dressed in costumes of the early eighties.

Egg and spoon race under 15, W. Propp 1, K. Pitzler

3-legged race, W. Propp and T. Propp won.

— The Donators —

Following is the corrected list of those donors of prizes from the business people in Stony Plain:

T. J. Hardwick

Louie Wudel

A. E. Michael

Zillox & Kast

Royal Hotel

Larson's Royal Cafe

Cash Store

Wm. Kelly

Mr. Donaldson

Opperhauser & Sons

Red & White

J. F. Clarke

Stony Plain Motors

Barth & Anderson

Sommerfield & Mayer

From Edmonton—T. Eaton Co., C. Woodward, Jackson Bros.

Those in our district were:

Mrs. F. F. Williams

Mrs. C. Pitzler

Mrs. E. Pitzler

Mrs. A. Anderson

Mrs. D. L. Davidson

Miss Elsie Anderson

— Baseball —

1st ball game, Holborn 10, Graminia 10.

2nd game, Bright Bank pupils 14, Holborn pupils 3.

3rd game, Hansen's Corner 11, Graminia 10.

— Basket Ball —

Holborn 19, Stony Public School 16.

Holborn Juniors 13, Brightbank 15.

S.P. Public School girls 9, Brightbank 8.

Tug-of-war — Holborn v. The World. Latter team won.

L. Wudel won the 22 shoot.

Nail-driving — Mrs. F. Allen.

Mrs. Woodley's aim hasn't diminished very much, for she hit poor old Jiggs without fail three times and won 1st prize.

A tiptop dance was held after, at which everybody enjoyed themselves. A splendid crowd attended the closing of a perfect May 24th.

Schlecker & Mrs. Percy Davidson supplied the music.

Co-ops. Making Progress.

Information has recently come to hand that in the city of Toronto a Co-operative Milk Society is being organized along similar lines to that now operating in the city of Calgary. In Toronto recent steps were taken by a group of consumers to open on Danforth Avenue a co-operative store on the Rochdale plan. Thousands of such instances could be found.

Church Services.

CHAPTER XI.—Continued.

"Good Lord! And you've deserted, too, Ped."

"But I couldn't miss out on a trick like this, could I?"

Alan winced. Here was Pedesault mixed up in his trouble. Like an eager wolf-bound whom his master has left behind, Ped had chewed his collar and come along on the hunt.

"Where's Bill and Joyce?" Pedesault's face grew long, his eager excitement sobered down. He decided it was better to say nothing at all just now about Dave's suicide. Alan had enough anxiety preying on him.

"I'm thankful for that gasoline," Alan said. "And for you throwing in with us, Ped, at the price you'll pay. But I don't see how you can help. You can't carry a third person on this trip. I'll have to have room to work the machine gun."

"Then I'll go in the launch," Alan said. "You can't make it. Above the Alooska forks there's twenty miles of low water that you can't get through."

"I can make it now. I know what the launch can do. After all these heavy rains, draining down that left fork from the Thal-Azzah. . . Look there—" he pointed at the water stage on a pier—that's eighteen inches higher than when we made our first patrol after them. I can get through; and once I'm in those deep-water channels of the Thal-Azzah—"

"All right," Alan agreed. "You'll be a mighty big help. If they put us out of it, you'll be in position to carry on with them. Let's go up to the post and make our arrangements. You'll be leaving ahead of us."

Meeting Buzzard in the trading hall, he introduced Pedesault and explained. They went on back to the kitchen and worked out their plans. Pedesault was to leave at dawn in the launch. Then the plane would leave at ten o'clock. Passing Pedesault just inside the Thal-Azzah, the plane would fly ahead, locate the bandits and bring them to bay. The two craft would thus close in together for the battle.

There was but one hitch in the plan. All three men were aware of it, but no one mentioned it. Those bandits had Joyce with them; they could

and would use her for protection. How could they be swept with a machine gun's deadly spray when she was with them?

It was something which had to be left to luck or fate.

Alan gave final instructions: "If anything happens to the plane, don't try to fight those five men by yourself. Pedesault. Swing wide of them, go on east to that big lake I mapped for you, and join Bill there. Then the two of you fight them to a finish."

"One other thing," don't want Buzzard or myself to be charged with murder. You're in service, Pedesault; you'll not only be on a legitimate patrol, but you have the power to deputize us as special constables. We'd better put that down in black and white."

It seemed strange to Pedesault, who had sworn in half-breeds and Indian scouts and dog-team drivers on emergency occasions, to be swearing in his former officer commanding so lowly a capacity. He wrote out the formal authorization: James A. Featherfoot, status, special constable temporary; capacity, aviator. Alan Elwood Baker, status, special constable constable temporary; capacity, scout and machine gunner.

At the earliest hint of dawn they went down to the landing, inspected the launch and lashed Joyce's light canoe on the stern half-deck. Pedesault shook hands with them, slipped into the wheel seat, and set out alone, a solitary figure, up the Big Alooska.

Waiting, nervous and jumpy, as both had waited for zero hours in France, Alan and Buzzard stalked about the unutterably lonely post.

At nine o'clock, drawn down to the landing, they went over the plane for the third time, and Alan mounted the machine gun in the cockpit. When their zero hour came, he towed the craft out into midstream, held it there while Buzzard warmed the spluttering motor, and then sending the canoe spinning with a kick, he sprang up into his seat.

Buzzard lifted the plane out of the river, climbed to five thousand feet, and headed into the northeast.

CHAPTER XII

The Swan Nest

Thirty miles above the Alooska forks, they caught up with Pedesault. When he saw that all was going well with him, Alan turned his glasses ahead again, sweeping the dense waterways within vision. He picked up two tiny black objects creeping up a broad blue channel ten miles in the Thal-Azzah.

Signaling Pedesault that they had sighted the canoes, Buzzard slowed down to stalling speed. Pedesault answered back that he understood and they saw him open out the launch till a long narrow V-wake of white froth stretched behind it. Then, winging on ahead, they closed in for the battle.

As they drew near and Buzzard dropped to a couple thousand feet, Alan began to make out figures in the two craft. His heart leaped as he counted six persons. Nearer still, he distinguished a slender girlish figure in the prow of the lead canoe. They must have found that gun on Joyce, or else she had clung to her faith that he would save her.

Half-raised, Alan glanced back westward to find how near Pedesault was. A puzzled expression crept over his face as he failed to glimpse the launch in either the Alooska branch or the broad blue channel. With a premonition of disaster clutching him, he whipped up the glasses, focussed on the coming creek, and caught the big boat in clear vision.

The thing he saw brought a cry into his throat.

The craft was not moving. It lay on its side, half out of water, hopelessly stranded. Either from reckless piloting or from an accident no man could have averted, Pedesault had struck a mud bar hidden under the treacherous muskeg water; and now the scarlet-and-gold launch, lodged solidly in the muck by the momentum of its leaping dash, was out of the battle for good and all. Pedesault could not even go and help Bill.

Alan tore his gaze away from this disaster. It was all up to him and Buzzard now. Pedesault was out the launch was out; Bill was a hundred miles away, and alone.

He tilted the Browning muzzle downward and steadied himself to

run a burst at the rear canoe. But that craft darted up alongside the leading boat and hovered there, protected against his machine gun by their nearness to Joyce. With sudden faces upturned, the bandits watched the manoeuvring plane, waiting for Alan's next move, delying him to touch them.

Buzzard had banked in a neat hair-pin turn, had dropped down to six hundred feet and was flying back past a hundred yards off the vertical on that space of hopeless dead-end that Joyce came through. Alan saw her make him some slight sign, a mere gesture which the bandits, leering up at him, did not see. He read the meaning of that gesture; Joyce was preparing for some sudden action; he was signalling him to be ready!

Without a whisper of warning, so swiftly and neatly that the bandits looked around in dazed bewilderment, she half-rose in the canoe, dived headlong over the gunwale, and disappeared.

It came so suddenly that for moments Alan himself hardly comprehended what she had done. When he did realize that she had given him his splendid chance, his finger tightened on the trigger, and the Browning leaped into play.

For twenty seconds, till there was danger of Joyce reappearing, he failed and swept the two canoes with a rain of bullets. He scorched one man, who jumped and yelled. The deadly hail drove them pell-mell in terror of their lives, into shelter of the nearest fags.

Fifty feet from where she had dived, Joyce reappeared a moment, cast a frightened glance back, tossed the dishevelled hair from her eyes, swam a stroke or two, and then slipped under again like a young otter, making for a soggy reed bed on the other side of the lake.

"Low! Fly low!" Alan shouted into Buzzard's ears. "Sweep low over 'em. They'll try to get her again, if we don't force the fight now!"

With rifles snarling at them from fags below, with white puffs of smoke drifting away on the breeze, the plane banked and dived; and less than four hundred feet high, it soared over the bandits, its third time, its last and fatal time. . . .

Nearly flung bodily by the quick wrenching manoeuvres, Alan braced himself and hung grimly to the Browning and ran a burst at the fags that the bandits were firing from. He killed a man, he saw the criminal fling up his arms and stagger and fall face downward in the reeds and froth water. With another burst, enfilading those fags from a side angle, he would have wiped out the other four.

But that chance was not given him. The thunder of the gun suddenly slackened, the motor spluttered and died; in place of the throbbing roar Alan heard only the swish of struts and hum of wires. In the sudden quiet he heard Buzzard's cry of consternation and saw his flight partner turn a white face toward him; and he guessed the engine had been put out of commission by those snarling rifles in the fags below.

The next instant, with those rifles still blazing away, a tremor seemed to hit the plane, as though other bullets had struck it. It heaved violently, its nose and right wing dropped, and it started a steep side-slip. With a gesture of sickened despair at this second mortal blow, Buzzard cut off ignition and battled with stick and rudder-bar to keep the plane from plummeting into the bog under heel.

Two-thirds of a mile from the bandits, it fell heavily into the water on one wing and pontoon, rocked a moment uncertainly, righted itself and floated—but disabled, useless, out of the battle.

(To Be Continued.)

Perfectly Safe

A woman went to the bank and asked for a new cheque book. "I've lost the one you gave me yesterday," she said. "But it doesn't matter. I took the precaution of signing all the checks as soon as I got it—so, of course, it won't be any use to anyone else."

Divorces in England

Seven Thousand Persons Divorced in Great Britain Every Year
One out of every 83 marriages in England ends in divorce.

There are now about 30,000 divorced persons in England and Wales—and 25 per cent. of them live in London. These are some of the facts revealed by the latest divorce records given in the register-general's annual report. Because divorce is now easier to get, more unhappy marriages are being terminated. As a result there are now five times as many divorces in a year as there were twenty years ago.

Men are petitioning for divorce in greater numbers. For years the records showed that it was the wives who got most of the divorces. But for the coming term of the law courts at which divorce cases will be tried there are 197 petitions filed by husbands and 351 by wives.

Although 7,000 persons in Great Britain are divorced every year, 66 per cent. of them re-marry. Two out of every three divorced men contract second marriages. And so do three out of every five divorced women.

But when they marry again they choose partners who have had no previous experience of matrimony. Only in one case out of ten do divorced men marry divorced women.

In three cases out of four divorced men marry spinsters. The spinster brides are usually under 30 and the husbands between 30 and 40.

In two cases out of three divorced women get bachelors for their second husbands. Most of the divorced women are from 30 to 35 and they generally marry bachelors about five years younger than themselves.

About one-half of the divorces occur within the first ten years of married life, although the general tendency is for divorces to take place later in life.

THE RHYMING OPTIMIST

By Alma Michelson

VILLANELLE OF SPRING

I saw the nesting robin light
Upon the branch, with twig in mouth,
I sensed the feather thing's delight
In end of barren winter's drouth,
In spread of dusky and swinging bough
And warm wind blowing from the south.

The whistling farm boy with his plow,
The furrows deep and straight and long,
Gold daisies on the green hill's brow,
The rainbow butterflies that throng
The waterways many-colored grass,
All blend with nesting robin's song.

Anew the old enchantments pass
And lend brief magic to the land,
Till ever eager lad and lass
Meet joyous on the fragrant strand,
And share the nesting robin's mirth!

Champion Jig-Saw Puzzle

Blind Man Claims Inability To See Is An Asset

Stanley Wartenburg, 26, of New York, blind since childhood, is a champion jig-saw puzzle, and he claims that his inability to see is really an asset in putting the puzzle pieces together.

According to Wartenburg, color and lines in the puzzle pictures are handicaps to their rapid assembly.

His method is to first turn all the pieces either face up or face down, and then sort out the border pieces, and then the corner sections according to their shape. A remarkably trained memory is also a great asset. With his left-hand he explores the curves of the pieces already assembled and with the right seeks their mates.

Wartenburg is industrial artist to broom and mop makers in the New York workshop of the Association of the Blind. He has invented many pieces of machinery used by blind workers.

Portraits of His Majesty

Five portraits of His Majesty the King were presented to Inspector Sandy Wunch, of the Royal Canadian Mounted Police, by Miss M. F. Mackenzie, regent of the Municipal Chapter of Montreal, L.O.E. These portraits are intended for five detachments of the Eastern Arctic sub-division of the R.C.M.P.

Little Helps For This Week

"Thy servants are ready to do whatever my lord the king shall appoint."—2 Samuel 15:15.

I love to think that God appoints My portion day by day.
Events of life are in His hand,
And I would only say,
Appoint them in Thine own good time,
And in Thine own best way.

If we are really and always ready to do whatever the King appoints all the trials and disappointments arising from any change, great or small, simply do not exist. If I meant to write His messages this morning shall I grumble? He sends interrupting visitors, rich or poor, to whom I am to speak the messages, or to whom I am to show kindness for His sake. If all my members are really at His disposal why should I be put out if today's appointment is some simple work for my hands or errands for my feet, instead of some seemingly more important doing of head or tongue.—Frances R. Havergal.

Hunting For King's Baggage

Sunk In North Sea Over 700 Years Ago Says Tradition
Fen Research Limited, London, England, is the name of a company formed to hunt for the famous baggage and regalia of King John lost in the waters of the Wash a little more than 700 years ago.

This is a change from the usual treasure hunts organized with an eye on Cocos Islands or the Spanish Main, and many think it probably will prove about as successful. Tradition says King John's baggage and regalia were lost in the Wash, and the company mentioned, appears to think tradition is right and is about to start digging for the lost treasure. It proposes to locate the treasure by "electrical divination." The Wash is a shallow bay of the North Sea, on the Lincolnshire and Norfolk coast of England.

Many Protest Against Plan

Auto Drivers in Greece Do Not Favor Restrictions

Greece's road odd-even auto license idea is arousing much protest. The plan is that cars bearing even tag numbers may use the streets on certain days of the week and those with odd numbers the other days. The idea was to reduce imports of gasoline, but in Athens retail sales of "gas" have dropped less than three per cent. since the rule was enforced. One-car owners do not relish having their machines idle half the time. Taxi users in Athens complain that now there are not enough taxis.

Many Honest Passengers

Glasgow, Scotland, believes that it has many honest street-car passengers. Because conductors misused many fares in the rush hours officials of the municipal trolley lines placed little red boxes near the exit, and a sign asked those who had not paid to drop the penny in the box as they left. Since the plan was started more than \$100 a week has been collected by the boxes.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile

—Without Calomel

Your liver is a very small organ, but it controls the health of your whole body. It cleans out of the blood the poisons that your body takes in. It is the only organ that you cannot see. You can only know it is working by the color of your skin, the color of your eyes, the color of your hair, the color of your nails, the color of your teeth, the color of your tongue, the color of your breath, the color of your sweat, the color of your urine, the color of your stool. If your liver is not working properly, you will have a yellowish tint to your skin, your eyes, your hair, your nails, your teeth, your tongue, your breath, your sweat, your urine, your stool. This is called jaundice. It is a serious condition. You must get your liver working properly again. You can do this by taking Little Liver Pills. They will clean out your liver, and make it work properly again. They will also make you feel better, and give you more energy. They will also make your skin clear, your eyes bright, your hair shiny, your nails strong, your teeth white, your tongue pink, your breath sweet, your sweat fresh, your urine clear, your stool regular. This is the way to good health. Take Little Liver Pills today. You will be glad you did.

Baseball Prattle—By H.C.O.

We don't mind a team losing the odd game, but when the even ones go, too, it begins to look bad. Oh, well! many a team has made a poor start and a good finish, and we may be in that class. It's not too late, yet.

The band's playing may have affected our players, at least it took them 8 innings to warm up, and what an inning that 9th turned out to be, my Countrymen! We nearly won that game; but since we didn't, give the boys credit for the rally. Being beat 11 to 10 isn't so bad.

Two things were quite noticeable last Wednesday. One, we had a good hurler in Ed Enders. Give him more nerve and better support and he'll be a tough nut to crack. Two, C Brox is a good imported player. He scored more runs than any 2 other players, has 2 walks to his credit, and a batting average of .571. Not bad; also a good example.

We'd like to see a few more local youths get a chance to strut their stuff. It seems to me we have one or two here, who could make just as many errors as these imported players, and enjoy it, too! Brass is known as a great fielder, and Ed Mayer ought to be able to nail them at the bags. Why not try it and see?

Our next home game is on Sun

Light Up the Old Bus.

The new Act to amend the Vehicles & Highway Traffic Act is now in force. One of the provisions of this Act requires front and rear lights on motor vehicles, whether running or stationary, on main or secondary highways, and also provides for the use of rear reflectors.

Next time we again meet the A & N Cubs. Next Wed. June 14, we are hosts to Red Sox. These will be good games, and here's hoping we can sock 'em!

Waltham League ballplayers have entered a 4-team league, comprising W-L at Stony, Smithfield, Wabamun, Seba Beach. Wabamun Fishaters were scheduled to play here Sunday last, but failed to turn up. No other dates are known to your Reporter at present, but we'll try and get a schedule for next issue. The locals ought to develop a few players for the Seniors and the games should be worth watching.

Standing Big Five Ball League, at June 5—

	P	W	L	PC
\$ Cleaners...	4	3	1	.750
Morinville...	3	2	1	.667

A.N. Cubs...	3	1	2	.333
Stony Plain...	2	2	0	.000

Next home games June 11 & 14

Mr. Singer Leaves Stony.

With a view to a probable change in location, Mr C G Singer, who has been an efficient and courteous teller at the local bank for the past three years, on Friday handed in his resignation to the manager, and left in the evening in the company of friends.

Basketball.

Brightbank Bluebells defeated S.P. Juniors on the H. S. court, Sat. last, with a 3-point lead, in 40 mins. of fast basketball. Despite the fact that Juniors were at a disadvantage in weight, they made some wonderful plays, including a remarkable shot by Elsie Fuhr. Standing with her back to the basket, Elsie made a perfect toss over her head and scored. Team: E Michael, M Pailer, G Peters, R Willie, E Fuhr, E Zucht, M Goertz. Scorers: E Michael 1, E Fuhr 4, R Willie 4.

In the Midget Basketball League on Friday, the Public School Buds made 15 to St Matthew's 10.

Duffield Doings.

The posters are up for Duffield's big event—the annual picnic and boxing tournament. As usual, there are to be horse races, horseshoe pitching, baseball matches, and 9 schools competing for the P. Faulks shield.

In the boxing contests, some half-dozen events are billed to be pulled off, including some of the good mit artists who were in the ring at Duffield last winter. In the wind "go" we should see the fur fly, as this contest will be between Wynnie Burnett, from across the river, and "Kid" Gruhn, at nearly matched weights, for 6 rounds—if it lasts that long.

The dance at the finish of the sports day, should see the good sized crowd which usually graces these very popular dances.

The recent meeting of Duffield W. L. proved very interesting. The members arranged to have a baby clinic held at Duffield some time in July. A report of the recent convention held in Calgary was read by Mrs N Hoop. A dainty lunch was served, at the close of business, by the hostess, Mrs R Brenner.

Wheat Pool Meeting.

On Friday next, June 9th, a public meeting under the auspices of Alberta Wheat Pool will be held at U.F.A. hall, Holborn, at the hour of 8 p.m. The speakers are to be Geo Bennett, director of the Wheat Pool; and J P Watson a field service representative of the same concern. Wheat Pool matters and the general wheat marketing situation will be discussed. Meeting is open to everybody.

U.F.W.A. Conference.

A Conference of U.F.W.A. Locals of East and West Edmonton districts will be held here Wed. July 5. This Conference is called by the Convention, Mrs Bentley of Horse Hills, and is sponsored by the U.F.W.A. Locals at Holborn and Hansen Corners. All members and non-members are invited to attend these sessions.

Stony Plain and District

Mrs D Davies, of Kapasswin Beach, was a week-end visitor in Stony Plain. During her stay here, she was a guest at the home of Mrs Outway.

Mrs Phil D Fuhr and Miss E E Wolfe started Tuesday on a motor trip to Jasper Park.

Mr E C Schmidt, formerly in charge of the local power house and organizer of the town band, paid Stony a visit over the week end.

Miss Margarette Seiber, neice of Rev. and Mrs. W.E. Seiber, left on Tues., May 20, on a visit to her brother in Birks Falls, Ontario, where she will finish her school year.

Mr and Mrs Jac Becker paid a visit to their daughter at Scotford, over the week-end.

The Nick Pasemko family, which had been evicted from their farm in Manly district a short time ago, and moved to Stony Plain, are still here, awaiting further developments.

The advance sale of tickets for Edmonton Exhibition is now on—5 for \$1. Get yours at the Royal Cafe.

Blueberry News.

Mr Sam Anderson the contractor and his staff of carpenters are at present engaged in constructing a set of buildings on the Highway, at the Pete Schoepp corner, across from the Enders mansion. The new layout will be occupied by Mr and Mrs William Dewald.

A dance is to be held at Blueberry Schoolhouse next Friday evening the 9th, under the auspices of the girls' basketballers.

News of Rosenthal.

While playing was stopped Sunday afternoon at the ball game on Rosenthal diamond on account of the storm, a thunderbolt struck in a nearby bluff of trees, giving the crowd a slight shock.

At Sunday's ball game at Rosenthal, while noddling down a base, Alfred Davis had the misfortune to have his left foot spiked by a runner with spiked shoes.

The Central League game here on the 4th resulted in a win for Brightbank over Rosenthal by 1 run.

Spruce Grove News

Miss Florence Taylor, Edmonton, spent a few days' holiday at Spruce Grove last week, visiting with her sister, Mrs Elder.

Mr and Mrs Sherwin spent Sunday afternoon at South Edmonton Park.

Mr and Mrs Forbes, accompanied by Messrs E and R Pinchbeck, motored to Elk Island Park on Sunday last.

Thru the able efforts of the junior members of the club, the local tennis grounds are now in shape for the coming tennis tournament on Friday, the 16th.

Thanks to the presence of mind of young Mr Harry McLeod, what might have proven a serious fire was narrowly averted Monday evening, when a window curtain in the kitchen of the McLeod residence caught fire from an overheated stove.

Another of the Grove's budding baseball artists is forging to the front. Clarence Brox, who is playing for a team in an Edmonton league, is making a name for himself for getting around the bases. All they have to do is let "Spike" get to 1st, and he does the rest. At the opening game in Stony last week he was first to score a run, and received quite an ovation for it.

Mr Brox made a business trip to Stony on Sat. evening. He was just in time to hear The Red River Jig, broadcast by the C. R. Commission.

Mr Jac Enders, formerly with the local Cafe, has secured a position up at Stony Plain.

Elephant Brand Fertilizer, in packages and bags, can now be had at the Spruce Grove Hardware.

Sparksie Says.

The 1933 version: Columbus was all wrong—the world is flat.

And, just to bring our Scripture up to date, the rain falls on the just and the unjust and the just polished automobile.

Never to Meet.

The deacon had, been dead a week. A parishioner who did not know, meeting the parson in the street, inquired:

"When do you expect to see Deacon Jones again?"

"Never, never again!" declared the parson solemnly; "the deacon is in heaven."

Business Locals.

Why send your films out of town to be developed? Have these done in Stony Plain by an expert. Phone 67.

The phone number of Carl Peterson, who hauls your cattle and hogs to market, is now One Three (13).
